

Garageband and Podcasting

GarageBand brings out the rock star in everyone.

It puts a music studio on your computer, where the band is never late and always plays in tune. This course teaches you how to create projects with GarageBand then post them as a Podcast to the Internet for others to download and listen to at any time. These audio files can be downloaded to a personal computer or handheld device such as an iPod.

Pre-requisites:

Students should have the following pre-requisite knowledge prior to attending this course:

Good computer skills

Duration: 1 day
